BIOST®

The **Bio ST-Seats and Backs** combine superb workmanship, easy field adjustability and functionality. Our Bio ST-Seats have, as standard features, two inches of high quality foams, a zippered Rubatex cover and are secured to a wheelchair frame with steel mounting brackets. Bio ST-Backs have, as standard features, one and a half inches of high quality foams, a zippered cover and are secured to a wheelchair frame with steel mounting brackets. Every seat bottom and rear of back will have aluminum tracks when a positioning device is ordered for it: Lateral Trunk Supports, Lateral Hip/Thigh Supports and Lateral Knee Supports.

BIOST-HD®

The Bio ST-HD Seats and Backs offer significantly superior quality and durability to any other wheelchair seating system available today. As standard offering on our Bio ST-HD Seats and Backs, we offer one and a half inches of high quality foams on our backs and two inches on our seats. All of our covers have zippers and the seats and backs are secured to a wheelchair frame with steel mounting brackets. To insure the maximum strength and durability of our Bio ST-HD Seats and Backs, we secure the "foam module" to an external, one half inch piece of High Density Polyethylene. To maximize adjustability of positioning devices; Lateral Trunk Supports, Lateral Hip/Thigh Supports and Lateral Knee Supports are all mounted in grooves cut into the external piece of High Density Polyethylene.
